Performance Metric

- According to a recent data from the International Energy Agency, the generation of renewable energy **increased** in **2020** at the quickest rate in twenty years.
- The capacity increase last year was 278 gigawatts, a **45 percent rise** and the most year-over-year growth since 1999.

| Market Size

TAM - \$1050.31 Bln

SAM - \$105.031 Mln

SOM - \$15 Mln

Market Validation

USA

140M houses

115\$ monthly energy cost

30% benefit

4.8B\$ benefit monthly

SWITZERLAND

4.7M houses

330\$ monthly energy cost

30% benefit

4.65B\$ benefit monthly

| Business Model

B2B

**Automated efficiency analysis
for optimal energy level for
non-governmental, private
entities**

B2G

**Automated efficiency analysis
for optimal energy level for
governmental organizations,
such as SOCAR, SOFAZ, BP**
